PROFILE

Computer Science student with hands-on experience deploying AI inference workloads on self-managed infrastructure. Runs Frigate NVR with real-time object detection in a production homelab backed by Linux, Docker, and a GPU-capable Proxmox cluster. Strong infrastructure foundation relevant to AI deployment and MLOps roles. Fluent English (CAE C1), German B2 (DSD II). EU eligibility from Jan 2027 (Italian citizenship).

EDUCATION

Pontifical Catholic University of Paraná | *B.Sc. Computer Science* **2024 – 2028**

- Expected graduation: March 2028. Coursework: Data Structures, Algorithms, Operating Systems, Databases.

Swiss School of Curitiba | *IB Bilingual Diploma* **2017 – 2020**

EXPERIENCE

Court of Justice of Paraná (TJPR) **Curitiba, Brazil**

IT Intern

Aug 2021 – Dec 2022

- Built a PHP web application (backend and frontend) for certificate management and administrative workflows of the TJPR School of Magistracy.
- Containerized the application with Docker and Docker Compose; deployed on AWS EC2; automated deployments with GitHub Actions; MySQL as the relational database.
- Configured Nginx as web server and reverse proxy.

PROJECTS

AI Inference on Homelab Infrastructure | *Frigate NVR / Proxmox* **Ongoing**

- Runs Frigate NVR with real-time object detection (AI inference) on a self-managed, GPU-capable Proxmox VE cluster; integrates detection events with Home Assistant for automated responses.
- Containerized inference workloads run on a hardened Linux environment with VLAN-segmented networking, WireGuard VPN, and Cloudflare Zero Trust access control.
- Experimented with local LLM deployment (Ollama) on homelab hardware; familiar with quantized model inference on consumer-grade GPUs.

Homelab – Infrastructure for AI Workloads | *Proxmox / Docker / Linux* **Ongoing**

- Two-node Proxmox VE cluster with GPU passthrough, ZFS storage, and full observability via Prometheus and Grafana – capable of serving containerized AI/ML workloads.
- Automated backup pipeline with offsite replication and monitoring via Scrutiny (S.M.A.R.T.).

TECHNICAL SKILLS

Applied AI Frigate NVR (object detection inference), local LLM deployment (Ollama), Home Assistant AI integration

Infrastructure Linux Admin, Proxmox VE (GPU passthrough), Docker/Compose, LXC, ZFS

Networking OPNsense, WireGuard, VLANs, Cloudflare ZT/Tunnels, Nginx, DNS/DHCP

Monitoring Prometheus, Grafana, Scrutiny (S.M.A.R.T.)

Programming Python (basic scripts), PHP, Bash, Git, GitHub Actions

Languages Portuguese (Native), English (Fluent – CAE C1), German (B2 – DSD II), Italian (Basic)

CERTIFICATIONS

Cambridge Advanced English – CAE C1 | Deutsches Sprachdiplom – DSD II B2 | In progress: CCNA 200-301
