

Gustavo Lazzari

gustavotlazzari@gmail.com | +55 41 98773-2772 | linkedin.com/in/glazzari | github.com/GLazzari1428 | Curitiba, PR, Brazil

EDUCATION

Pontifical Catholic University of Paraná | *B.Sc. Computer Science* **2024 – 2028**

- Expected graduation: June 2028 | Data Structures, Operating Systems, Databases, Network Security

Swiss School of Curitiba | *High School & IB Bilingual Diploma* **2017 – 2020**

EXPERIENCE

Court of Justice of Paraná (TJPR) **Curitiba, Brazil**

IT Intern

Aug 2021 – Dec 2022

- Deployed containerized applications using Docker and Docker Compose, implementing CI/CD pipelines with GitHub Actions for automated builds and deployments.
- Provisioned and managed cloud infrastructure on AWS EC2 and GCP Compute Engine for application hosting and data processing.
- Configured Nginx and Apache web servers; collaborated on backend development using PHP/Laravel and MySQL.

PROJECTS

Multi-Node Homelab Infrastructure | *Production-Grade Personal Environment* **Ongoing**

- Architected a two-node Proxmox VE cluster (Xeon E5-2450L/64GB + i5/16GB) hosting 20+ concurrent VMs and LXC containers running self-hosted services including Jellyfin, Nextcloud, Frigate NVR, and Home Assistant.
- Engineered network security with VLAN segmentation (IoT/production), Nginx reverse proxy behind WireGuard VPN, and Cloudflare Zero Trust with TOTP authentication for public-facing endpoints.
- Deployed full observability stack (Prometheus, Grafana, Scrutiny for disk S.M.A.R.T. analytics) and automated backup pipeline with offsite replication to Google Drive across the secondary node.
- Manage ZFS storage pools with hands-on disk failure recovery; high-availability DNS via PiHole across both nodes; UPS-protected infrastructure with SSL/TLS via Certbot and Cloudflare DNS challenges.

IoT & Smart Home Network | *ESP32 / ESPHome / Home Assistant* **Ongoing**

- Deploy and maintain 10+ ESP32 devices for lighting control, smart switches, and WLED installations, configured entirely via ESPHome (YAML/Jinja2).
- Integrate all IoT sensors and actuators with Home Assistant via MQTT for centralized automation, scheduling, and AI-driven surveillance (Frigate NVR with object detection).
- Build custom hardware including remote controllers with salvaged Cherry MX switches; 8+ years of daily soldering and electronics repair experience.

TECHNICAL SKILLS

Infrastructure Linux Admin (Arch/Debian), Proxmox VE, Docker, Docker Compose, LXC, ZFS, systemd

Networking OPNsense, OpenWRT, Nginx, WireGuard, Cloudflare (Tunnels/Zero Trust), PiHole, SSL/TLS

Monitoring Prometheus, Grafana, Scrutiny (S.M.A.R.T.)

DevOps GitHub Actions, Bash Scripting, YAML/IaC, Python, CI/CD Pipelines

Cloud AWS (EC2, currently pursuing Cloud Practitioner), GCP (Compute Engine)

IoT ESP32, ESPHome, MQTT, WLED, Home Assistant, Frigate NVR

Languages Portuguese (Native), English (Fluent), German (Intermediate)

CERTIFICATIONS

Cambridge Advanced English (CAE – B2) | Deutsches Sprachdiplom (DSD – B1/B2) | Currently pursuing: AWS Certified Cloud Practitioner (CLF-C02)
