gustavotlazzari@gmail.com | +55 41 98773-2772 | linkedin.com/in/glazzari | github.com/GLazzari1428 | Curitiba, PR, Brazil

EDUCATION

Pontifical Catholic University of Paraná | *B.Sc. Computer Science* **2024 – 2028**

- Expected graduation: June 2028 | Operating Systems, Databases, Network Security, Data Structures

Swiss School of Curitiba | *High School & IB Bilingual Diploma* **2017 – 2020**

EXPERIENCE

Court of Justice of Paraná (TJPR) **Curitiba, Brazil**

IT Infrastructure Intern

Aug 2021 – Dec 2022

- Provisioned and managed application infrastructure on AWS EC2 and GCP Compute Engine, handling deployment, configuration, and maintenance of production services.
- Implemented containerized deployment environments using Docker and Docker Compose, standardizing development and production workflows.
- Configured Nginx and Apache web servers for application hosting; automated build and deployment pipelines with GitHub Actions.

PROJECTS

Multi-Node Server Cluster | *Enterprise-Grade Homelab Infrastructure* **Ongoing**

- Architected and operate a two-node Proxmox VE cluster: primary node (Supermicro Xeon E5-2450L, 64GB RAM, Quadro P400) and secondary node (Intel i5, 16GB RAM) hosting 20+ simultaneous VMs and LXC containers.
- Manage ZFS storage pools with hands-on experience in disk failure diagnosis, pool recovery, and data integrity monitoring across aging enterprise drives.
- Engineered automated backup strategy: secondary node orchestrates all VM/container backups with offsite replication to Google Drive for disaster recovery readiness.
- Deployed high-availability DNS infrastructure (PiHole) across both nodes; UPS-protected systems ensuring service continuity during power events.
- Configured PCI passthrough (Jellyfin VM) and LXC device mapping (Tdarr) for GPU-accelerated H.265 transcoding via Quadro P400.

Network Architecture & Security | *Firewall, VPN, Zero Trust* **Ongoing**

- Configured VLAN segmentation (IoT/production) with enterprise-grade firewall rules via OPNsense (migrating to OpenWRT); practical knowledge of routing, subnets, and inter-VLAN policies.
- Deployed Nginx reverse proxy behind WireGuard VPN for secure internal access; Cloudflare tunnels with Zero Trust and TOTP for public-facing services.
- Implemented dual-domain architecture: `glza.xyz` (VPN-only) and `glza.cloud` (public) with automated SSL/TLS via Certbot and Cloudflare DNS challenges.
- Self-host identity and credential management: Vaultwarden (password vault) and PocketID (identity provider).

TECHNICAL SKILLS

Systems Administration Linux (Arch/Debian), Proxmox VE (multi-node), Docker, Docker Compose, LXC, systemd, ZFS, RAID

Networking & Security OPNsense, OpenWRT, Nginx, WireGuard, Cloudflare (Tunnels/Zero Trust), PiHole, SSL/TLS, VLANs

Storage & Backup ZFS pool management, disk failure recovery, Proxmox Backup, offsite replication, S.M.A.R.T. monitoring (Scrutiny)

Monitoring Prometheus, Grafana, Scrutiny, Glance

Cloud & Automation AWS (EC2), GCP, GitHub Actions, Bash, Python, YAML/IaC

Languages Portuguese (Native), English (Fluent), German (Intermediate)

CERTIFICATIONS

Cambridge Advanced English (CAE – B2) | Deutsches Sprachdiplom (DSD – B1/B2) | Currently pursuing: AWS Certified Cloud Practitioner (CLF-C02)
